MODEL: FI-3646

FAR-INTRARED MAGNETRONIC MOXIBUSTION

~ Your Inner Body Environmentalist ~

FIMM Feathering:

- Heat Therapy
- Magnet Therapy
- FIR Therapy

HEALTH-CARE PROPERTIES:

- ✓ Thermo-regulation effect;
- ✓ Improve respiration and release fatigue;
- ✓ Reinforce body energy and the use of nutrition;
- ✓ Physiotherapy for muscle and nerve disease;
- ✓ Revive reproductive mechanism;
- ✓ Activating immune system.

Comparison between Traditional Moxa and FIMM

	Moxa	FIMM
Principles	Through the burnings of Moxa products to achieve Heat Therapy	Through heated bio-ceramics to emanate FIR
Applied Body Areas	Energy points or Pain Areas.	All body areas, especially the eyes and anus that Moxa can not reach
Heat Intensity	Should be clothes off to apply Moxa. Better anti-overheat body reflections, but could result in burnt skins.	Can be applied with clothes on. Adjustable heat rates between 45-80 degree C. with protective designs.
Medical Indications	Works good for chronicle pains and health maintenance	Includes the properties of Moxa, plus eyes problems and facial cares.
Therapy Schedule	Set by professionals; normally every other week, six times per energy point.	Similar to Moxa, with shortened intervals and more sessions.
Professional Guidance	Substantial	Minimal
Costs	Depends	Fixed

FIMM SPECIFICATIONS: (EMC compliance)

- Power: 100V, 50/60Hz, 5W
- Main body size: Φ 65m/m
- Safety Device: Automatic thermo-regulation
- Content: Biochemical Ceramics Magnetic N/S Magnetism 1200G.x4 special heating object
- Indicator: Power on/off green light
- Power line: Thermal regulator to prevent overheating
- Constituting parts: main body; thermal regulator power control; 2 cotton cloth gloves for main body heat and clean protection; 1 fixing elastic band.

Features:

- Your Inner Body Environmentalist.
- III key functions: Heat Therapy, Magnetic Energy, FIR Therapy
- Very powerful "Chi"/"Qi" concentrate machine.
- Follow body energy point chart to practice Moxa and Acu-punch FIR nutrition.

FIMM Mechanism

Medical/Health Application Properties:

- Improving the reaction of physical oxidation and reduction - minimizing excessive fat accumulation and improving health;
- Thermo-regulation effect -- saving energy and maintaining body nutrition;
- Improving respiration and draining out hypodermic fat (be aware of water replenishment) -- achieving exercise effect, health, and beautification;
- Activating physical mechanism and function - exciting hormones and enzyme, draining out heavy metal, toxin, and sediment in body;
- Reinforcing energy -- activating metabolism, reinforcing the use of nutrition, and minimizing fatigue;
- Physiotherapy for muscle and nerve disease -- generating positive impact on inosine, lactate, and liver, erasing tension and unknown chagrin & pain;
- Suppressing cancer cells -- terminating the sabotage of
