

Use as Facial Cleanser

Customer Testimonials!!

Skin-E™ Seaweed products are formulated and synergistically blended to be 100% natural, non-toxic, non-irritating, and safe to use. It is the only complete natural solution for removing body fat, reduce cellulite, control body weight and tone muscle 24 hours a day. The innovative and state-of-the art Seaweed Spay combine more than 13 natural dietary ingredients into one formula for appetite suppression, fat-burning, and weight loss. Gingo biloba, Foti, ura ursi, rose hips, grapeseed are natural herb for brain, mind, body, skin and maintain energy and alertness during the diet program.

The Chinese have slim bodies, beautiful skin, and remain wrinkle-free until old age. Extensive scientific research attributes this phenomenon to the daily consumption of seaweed in their diet. In ancient times, Chinese women used seaweed in their bath for weight control.

In 1994, Quality Life International joined with leading Chinese dermatologists and biochemists to develop the Skin-E™ Seaweed Soaps for maintaining body moisture, exfoliating skin and slimming the body. These amazing products revolutionized the industry overnight. Skin-E™ Seaweed Soap is made of rare elements naturally found in seaweed and tropical plants. These elements are purported to have

strong permeability, to absorb into the skin quickly, to improve blood circulation, increase metabolism, and discharge subcutaneous fat.

In the early 90's, due to the increasing demand for better nutraceutical products, U.S. scientists developed the technology to store nutrients in micro-size beads equivalent to 1/50th the width of a human hair. This technology allowed nutrients to be placed into an aqueous solution without adding chemical additives, binders, fillers, and wax. They are absorbed through the lining of the mouth and enter into the bloodstream quickly and effectively without damage to the liver and body cells.

Skin-E™ Seaweed Spray uses this state-of-the-art technology to deliver the finest natural ingredients directly into your body to reduce weight by protecting you from the "snack attack", burning fat more efficiently, and preventing the formation of new fat and cholesterol. This 100% natural spray contains weight loss ingredients CitriMax™ and Seaweed Extracts, as well as ginkgo biloba to help with circulation and brain function, chromium polynicotinate to balance to help balance blood sugar, reduce cravings, and burn fat, fo-ti, rose hips, uva ursi, dandelion roots, and other only natural ingredients in a distilled water base to give your body a healthy edge while losing weight! These herbs also help to reduce body fluid retention and protect your cells from oxidation common with increased metabolic processes while increasing mental alertness.

According to the prestigious "Physicians Desk Reference", only 10% or less of a nutrient taken by pill form is available to be used by the body, the remainder is excreted through the liver, the kidneys, and digestive tract--While 90% of a nutrient delivered by an oral spray is quickly absorbed into the bloodstream for cellular use. The National Nutrition Institute has reported that oral absorption is the preferred choice of medical experts.

In 1997, our dedicated scientists again developed another exciting product, Skin-E™ Seaweed Cream, which allows users to lose weight while sleeping. Skin-E™ Seaweed Cream consists of highly concentrated seaweed extracts and Chinese herbs which reduce body weight and keep skin fresh, soft, and elastic.

All of our seaweed products are formulated and synergistically blended to be 100% natural, non-toxic, non-irritating, and safe to use. The Skin-E™ Seaweed are the solutions which can help burn body fat naturally, comfortably, and permanently.

Skin-E™ Seaweed Soap can also be used as a Facial Cleanser.....apply soap on the face with warm water and leave for a few minutes, then rinse and pat dry. Other similar products are made with large chunks of seaweed leaves and an artificial perfume. Our Skin-E™ Seaweed Soap is 2nd generation with granular size high quality seaweed extracts with aloe gels, olive oils, and other ingredients to assist the skin permeability. This unique formula make Skin-E™ Seaweed Soap excellent for cleansing, exfoliating and moisturizing the skin. Many people with sensitive and problem skin have found our soap more superior than other skin care products.
