WILDMAN

"The Only Natural Herbal Alternative For Men"

WildMan is a new generation, state of the art nutraceutical formula for treating men's sexual dysfunction (ED) such as impotence and premature ejaculation. This product was formulated according to ancient Chinese medical theory and manufactured by modern American pharmaceutical science and technology in FDA approved facilities.

WildMan contains only the highest quality natural ingredients which have been proven to regulate blood flow, dilate blood vessels, increase lean muscle, increase energy and vitality, strengthen the immune system, nourish kidney function to prolong erection and enhance male performance. WildMan utilizes amino acids that stimulate the production of nitric oxide, leading to the production of cyclic GMP which ultimately affects smooth muscle relaxation, allowing the penile arteries to expand and fill with blood. Men experience rock hard erections, as blood flow increases to the genital area, leading to increased sensitivity and intensity during intercourse.

Our formula is 100% natural with no harmful chemicals or additives, making it extremely safe to use. Numerous clinical research studies and laboratory data have all indicated that our proprietary formula and its synergistically blended ingredients are effective for male sexual performance and help rebuild his confidence. WildMan promotes male sexual performance and desire and is the only natural herbal alternative for men!

The Major Active Ingredients of WildMan

1. Oyster Powder: One capsule of WildMan contains 300 mg of oyster powder collected from 1 kg of fresh oysters. According to the 16th century Chinese Medical Bible, Compendium Materia Medica, and many other ancient medical books, oyster boosts sexual libido, prolongs erection and enhance sexual performance. Our laboratory research has discovered that oyster consists of 18 amino acids (alanine, L-arginine, cysteine, glutamic acid, methionine, aminoethylsulfonic acid, etc.), glycogen, zinc, calcium, iron, phosphorous, iodine as well as vitamin A, B1, B2, D and E. Many of these ingredients are considered nutritional libido boosters. For example, L-arginine increases nitric oxide, promotes blood flow, improves male penile erection and prevents impotence and men's sexual dysfunction. Aminoethylsulfonic acid enhances the immune system and strengthens heart function by lowering blood pressure and cholesterol levels. Glycogen is the energy source responsible for keeping the oyster's shell closed tightly. When consumed, they will be absorbed and stored in the liver for energy. Calcium alleviates arthritis, hypertension and back pain. Iron increase oxygen in the blood. Zinc stimulates male hormone and testosterone production to assist erection and ejaculation. Vitamin A strengthens immune system and help growth. Vitamin B1 helps heart condition and muscle strength. Vitamin D prevents pain and

osteoporosis. Vitamin E is an excellent anti-oxidant and keeps the blood thin and flowing smoothly to increase circulation.

2. Yam: A rich source of diosgenin known for its natural stress relieving and balancing/regulating properties. It is widely used for PMS and menopausal symptom relief. Many men have also discovered that yam promotes libido and energy and improves total well-being.

3. Chinese Tuckahoe (Poria Cocos): A well-known Chinese mushroom "fuhling" which is known to the rest of the world as "Chinese root". Through the years various medicinal properties have been attributed to tuckahoes, but the most startling of all is by Hobb in 1876, who described it as an aphrodisiac.

4. Gardenia: According to Traditional Chinese Medical theory, gardenia is categorized as a "cold" herb and is used to treat hot disorders such as infections and inflammatory illnesses. Gardenia also promotes blood circulation, opens the liver and detoxifies the blood. This may help promote normal sexual function.

5. Dahurian Angelica: Enhances blood circulation and fat metabolism to tone and increase lean muscle.

Directions For Use

1. Take 2 capsules with water one hour before sexual activities.
2. For faster results, open the capsules and take the powder with water or red wine to enhance effectiveness.

Warnings

1. Not recommended for patients with cardiovascular problems.
2. Keep out of the reach of children.
3. Anyone with skin disorders or hemorrhage related diseases needs to consult a doctor prior to consumption.
4. Drink plenty of water while taking WildMan to eliminate symptoms such as, dry mouth, reddening of the cheeks and extreme body heat.
5. Allow at least a three hours interval before taking another medication.
